Recent Projects

Sentences

Sentences is an interactive game where the player races against to the clock to unscramble as many sentences as possible. My future plan is to develop this into a mobile app.

Technologies: jQuery UI, Html5, Sass, Javascript, and Ajax requests to a JSON file I built to house the sentences themselves.

Pet Store

Pet Store is an app to help pet owners keep track of their pets' needs, appointments, and products.

Technologies: Pivotal tracker, Angular, Test Driven Development, github, Sass, CSS framework Skeleton, Travis CI, Knex.js, PostgreSQL, Passport Authorization, Heroku Deployment.

Kyūbot

Built as a new technology challenge with a group, created a javascript controller for a Sphero Robot by connecting via Bluetooth through the browser. I led the effort to build the project structure in React.

Technologies: React, Google Bluetooth API, the Sphero API, Sphero API, PostCSS, Web pack, Canvas, Joystick library

Work Experience

WORDBANK | *Localization Eng. Intern*

Assist boutique translation company by re-engineering translated content into original format, including InDesign, Photoshop, Illustrator, XML, WordPress, and more.
